Weekly **MORBIDITY REPORT**

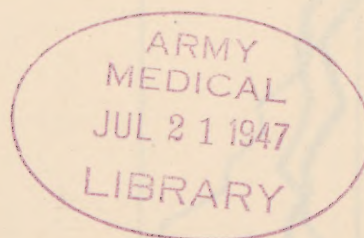

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAV MED 104

WEEK ENDING 27 April 1946

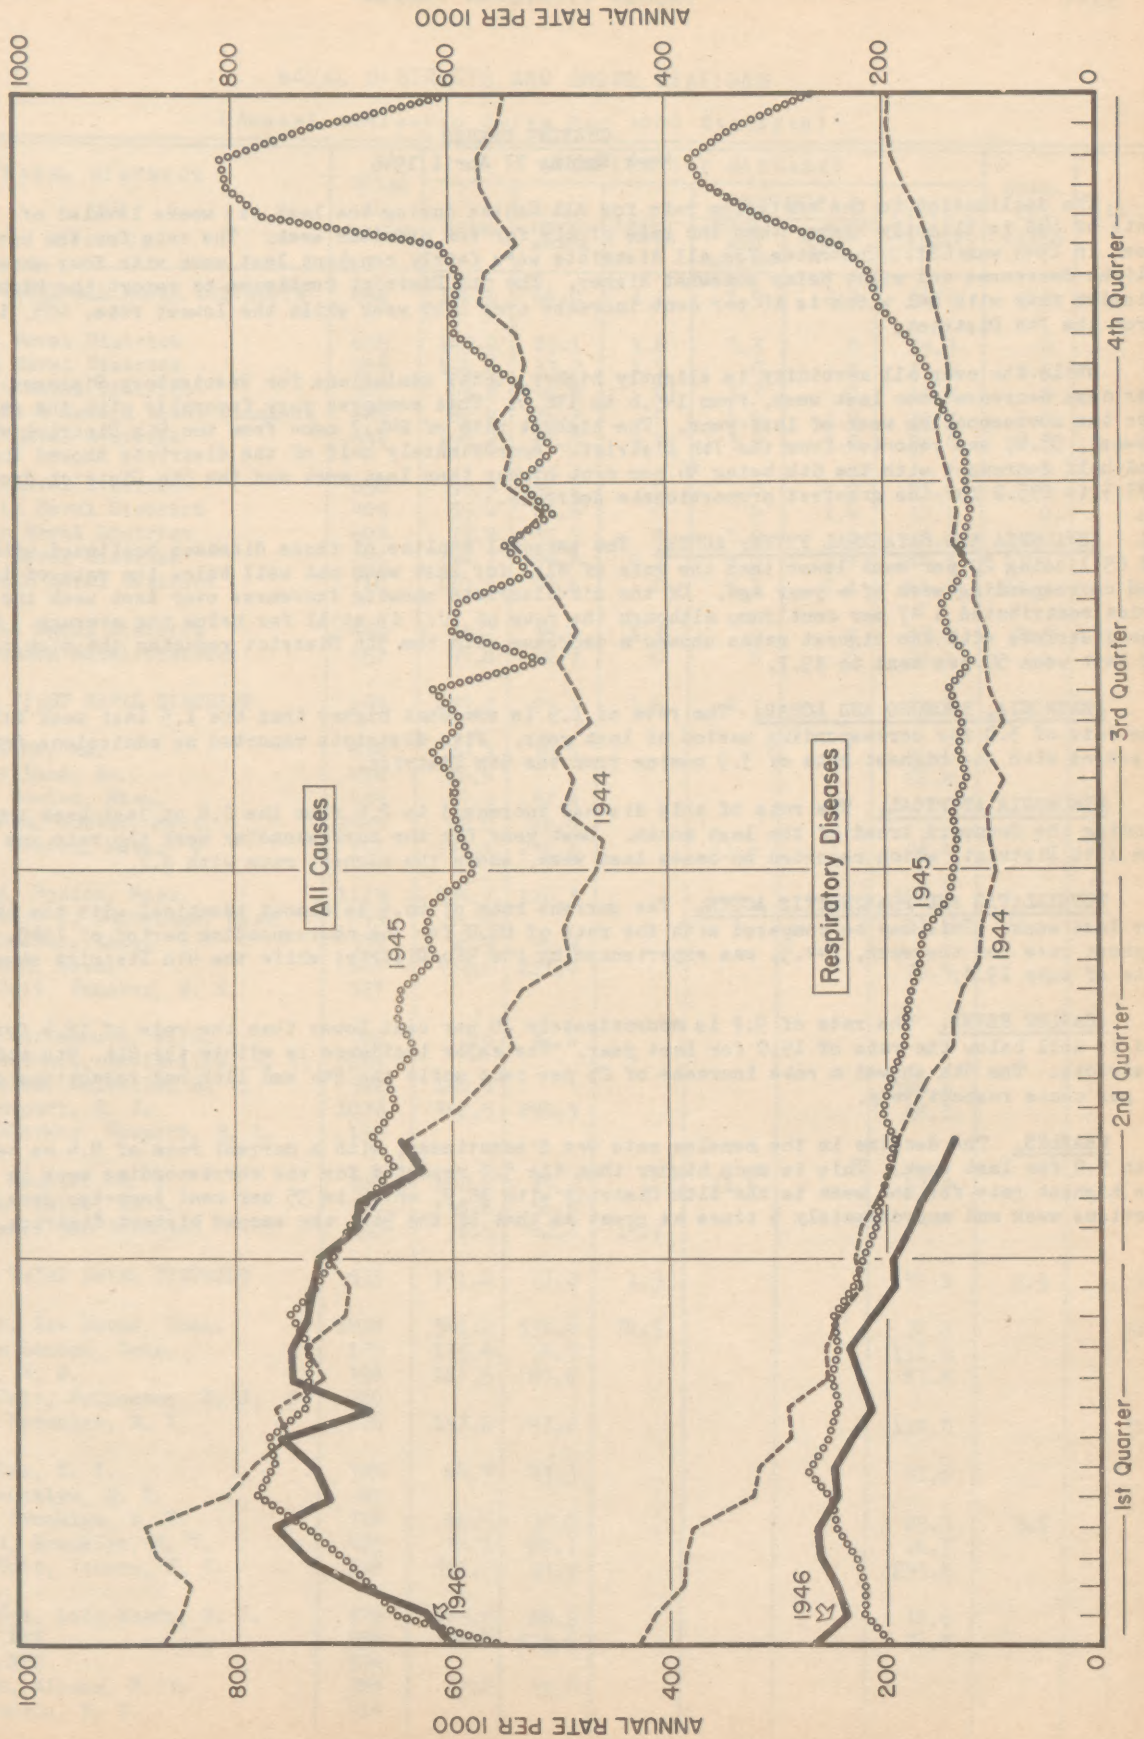

REPORT NO. 226

RESTRICTED — THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944, 1945, 1946

WEEKLY MORBIDITY REPORT

RESTRICTED

CURRENT TRENDS

Week Ending 27 April 1946

The declination in the admission rate for All Causes during the last six weeks leveled off and the rate of 648 is slightly higher than the rate of 629 for the previous week. The rate for the corresponding week in 1945 was 671. The rates for all districts were fairly constant last week with four showing slight decreases and eight being somewhat higher. The 5th District continues to report the highest admission rate with 841 which is 10 per cent increase over last week while the lowest rate, 405, is reported from the 7th District.

While the over all morbidity is slightly higher, total admissions for Respiratory Diseases show a 9 per cent decrease over last week, from 149.6 to 136.0. This compares very favorably with the rate of 191.0 for the corresponding week of last year. The highest rate of 244.7 came from the 9th District while the lowest, 55.4, was reported from the 7th District. Approximately half of the districts showed increases and half decreases with the 8th being 36 per cent higher than last week and the 5th District dropping from 273.3 to 195.2 for the greatest proportionate decrease.

INFLUENZA AND CATARRHAL FEVER, ACUTE. The seasonal decline of those diseases continued with the rate of 65.1 being 20 per cent lower than the rate of 81.2 for last week and well below the rate of 126.5 for the corresponding week of a year ago. Of the six districts showing increases over last week the 8th District contributed a 47 per cent jump although the rate of 30.7 is still far below the average. Nearly all the districts with the highest rates showed a decrease with the 5th District reducing the high rate of 180.3 of last week 50 per cent to 89.7.

PNEUMONIA, BRONCHO AND LOBAR. The rate of 1.9 is somewhat higher than the 1.5 last week but is below the rate of 3.0 for corresponding period of last year. Five districts reported no admissions for these diseases with the highest rate of 3.9 coming from the 5th District.

PNEUMONIA ATYPICAL. The rate of this disease increased to 2.6 from the 0.8 of last week thus discontinuing the downward trend of the last month. Last year for the corresponding week the rate was 2.0. The 11th District, which reported no cases last week, shows the highest rate with 8.1.

TONSILLITIS AND PHARYNGITIS ACUTE. The current rate of 66.5 is almost identical with the 66.1 rate for last week. This may be compared with the rate of 60.0 for the corresponding period of 1945. The highest rate for the week, 144.5, was experienced by the 9th District while the 4th District showed a rate of only 19.8.

SCARLET FEVER. The rate of 9.7 is approximately 20 per cent lower than the rate of 12.4 for last week, and is well below the rate of 15.0 for last year. The major incidence is within the 5th, 9th and the 11th Districts. The 5th showed a rate increase of 25 per cent while the 9th and 11th had reductions of 13 and 57 per cents respectively.

MEASLES. The decline in the measles rate was discontinued, with a current rate of 9.4 as compared with 9.0 for last week. This is much higher than the 5.0 reported for the corresponding week in 1945. The highest rate for the week is the 11th District with 38.9, which is 35 per cent increase over the previous week and approximately 5 times as great as that of the 9th, the second highest district.
